Please find below and/or attached an Office communication concerning this application or proceeding.

Advisory Action

Application No.

09/804,083

Applicant(s)

NOSAKI ET AL.

Examiner

Thomas H Parsons

Art Unit

1745

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 08 December 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

PERIOD FOR REPLY [check either a) or b)]

- a) ☒ The period for reply expires 3 months from the mailing date of the final rejection.
 b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.
 ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 1 ☐ A Notice of Appeal was filed on _____. Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.
 2 ☐ The proposed amendment(s) will not be entered because:
 (a) ☐ they raise new issues that would require further consideration and/or search (see NOTE below);
 (b) ☐ they raise the issue of new matter (see Note below);
 (c) ☐ they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
 (d) ☐ they present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: _____

- 3 ☐ Applicant's reply has overcome the following rejection(s): _____.
 4 ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
 5 ☒ The a) ☐ affidavit, b) ☐ exhibit, or c) ☒ request for reconsideration has been considered but does NOT place the application in condition for allowance because: See Continuation Sheet.
 6 ☐ The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.
 7 ☐ For purposes of Appeal, the proposed amendment(s) a) ☐ will not be entered or b) ☐ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

The status of the claim(s) is (or will be) as follows:

Claim(s) allowed: _____

Claim(s) objected to: _____

Claim(s) rejected: _____

Claim(s) withdrawn from consideration: _____

- 8 ☐ The drawing correction filed on _____ is a) ☐ approved or b) ☐ disapproved by the Examiner.
 9 ☐ Note the attached Information Disclosure Statement(s) (PTO-1449) Paper No(s). _____.
 10 ☐ Other: _____

 Technology Center

Continuation of 5 does NOT place the application in condition for allowance because: As to the Applicants' argument that Oshima does not teach or suggest the collectors as being "current" collectors in the sense they collect electricity, the collectors of Oshima are in electrical contact with the anode and cathode terminal and therefore would obviously provide the claimed current collector. Further, the structural relationship between the anode, cathode and collector of Oshima is the same is instantly disclosed, and therefore, would obviously provide the claimed collector, in addition, the Applicants' argue that the collectors generate oxygen in the oxygen generator chamber and hydrogen in the hydrogen chamber. This generation occurs because the collectors are collecting current to effect electrolysis of water in each chamber.

As to the Applicants' argument that Suga does not disclose or suggest cells that are connected in series to each other wherein the anode, cathode, and electrolyte membrane are parallel to a hypothetical plane since Figure 3 of Suga clearly shows the anode and cathode as being perpendicularly arranged to the film and hypothetical plane, the modification of Suga with Dempsey or Oshima provides plate shaped anodes and cathodes arranged parallel to the film and hypothetical plane.
